COMPANY OVERVIEW

OceanMight Sdn. Bhd. (OMSB)

Subsidiary company of KKB Engineering Berhad, is a Petronas licensed fabrication yard for Offshore Facilities Construction - Major Onshore Fabrication. OMSB offers full project services including Engineering, Procurement, Construction, Installation and Commissioning (EPCIC) to meet demands from its clients. Its Offshore Oil and Gas product range includes substructures, inter-platform bridges, topsides (well head platform), structures for central processing platforms and compression platforms, piles, modules, decks, living quarters, jackets, process skids, tote tanks and modular compression skids.

Through its parent company, OceanMight benefits from the rich construction heritage and history of excellence in structural steelworks fabrication spanning over a period of more than six decades. It is continuously bringing in talent to develop its human capital and technical know-how to further strengthen and enhance core competencies in yard management and project execution.

MODERN YARD

OMSB operates a modern fabrication yard which covers an area of approximately 70 acres (284,000 square metres), strategically situated along the Sarawak River with close proximity to the South China Sea. Its jetty has the capacity to load-out 30,000mt of fabricated structures and a 9m draft during high tides. This excellent position provides a competitive advantage over regional fabricators for load out of completed structures to final destinations within the ASEAN waters.

The location of the yard is easily accessible by road or inland waterways.

OMSB's yard is purpose-built with large prefabrication and assembly covered bays, cold rooms and material stores, auto blasting and painting facilities. It is equipped with state-of-the-art indoor fabrication facilities and automated technology for optimization of yard and operations. Pipe spool and structural steelworks production, automation and advance Software Solutions for integrated Project Management, Fabrication and Enterprise Resource Planning.

▣ FACILITIES & RESOURCES

Cutting edge technologies are used in the Fabrication yard whereby a Pipe Spool Production Centre is equipped with technologically advanced CNC pipe profiling, CNC plasma cutting, automated fit-up system and automatic pipe welding machines with world-class quality deliverables of pipe spools, skids and modular systems. All indoor production automation facilities are housed under covered production plant, permitting all weather working conditions to meet Clients' timely deliverables, Safety and Quality Control.

An extensive host of equipment such as heavy machinery for lifting, crawler cranes, mobile cranes, forklifts, trailers and other production machinery are constantly upgraded to meet the growing demands of quality production.

Commitment to Quality & Safety
