

Pipe Check

State Infrastructure Development Minister Datuk Raymond Tan Shu Kiah listens attentively to the briefing by Dato' Kho Kak Beng ,the Group Managing Director of KKB Engineering Berhad and KKB Industries (Sabah) Sdn Bhd , on the quality of the steel pipes manufactured by the company, during a visit by a delegation of senior officers from the Infrastructure Development Ministry and the Kota Kinabalu City Hall (DBKK) to the company's plant located in the Kota Kinabalu Industrial Park (KKIP) yesterday.

The visit was aimed chiefly at examining the quality of the Steel pipes manufactured by the company, as some of its steel pipes are to be used in various infrastructure development projects in the state, including the ongoing Sandakan Water Supply Project PhaseII and the Paper Water Supply Project.

Tan stressed that his ministry is taking the quality of materials used in its various projects seriously, in order to ensure that public money is well spent.

KKB is also the supplier for the steel structures for the Kota Kinabalu International Airport (KKIA) Low-Cost Carrier Terminal (LCCT) Project and the KKIA extension project Package1.

Also in attendance during the visit were the Ministry's Chief Assistant Secretary I, Melvin Majanga, Assistant Press Secretary to the Minister, Nicholas Wong; the State Water Department's Chief Engineer, Lim Lam Beng; State Public Work Department's Deputy Director II, John Anthony; the officer –in-charge of Sewerage division, Paul Thien ; and DBKK Senior Engineer Ir Lee Tet Fon.-MICHAEL TEH
